TREE PROTECTION INFORMATION

Protective fencing and ground measures to be installed at locations specified in the Department of any demolition works.

Uprights driven into the ground to 60cm depth at no more than 3m spacing. Framework to be braced within high usage/construction/demolition areas. Wellmesh panels to be securely fixed to uprights to prevent them from being blown over. Wet/dry weather signs to be attached to every 5th panel declaring 'KEEP OUT' or similar wording. Fencing to be constructed in accordance with fig. 2 and section 6 Specifications of SS5837:2012.

BS55837:2012.
