Subject: RE: West Street Havant

Good afternoon Ron,

With regard to our conversation last Friday, I recall discussing the following:

- Your proposal to block pave the parking bays (previously approved as bitmac with granite sett delineation and heritage kerbs). I confirmed I had no objection to the substitution of blocks for bitmac. Similarly, there is no objection to the substitution of granite sett bay delineation for contrasting colour or marker blocks.
- Your proposal to edge the main access road with standard kerbs (previously approved as 'Conservation' textured kerbs with a triple granite sett margin). I confirmed this would not be acceptable given the context of the listed building and close proximity of the Conservation Area.

I am aware the original application comprised a block paved courtyard, which was subsequently changed to bitmac to comply with Portsmouth Water's requirement for impermeable paving. This change to bitmac was accepted on the proviso that textured kerbs and granite setts would be incorporated in order to maintain the quality of place in the context of the historical setting - particularly since the access road is the more visible part of the rear parking courtyard.

I am more than happy for you to forward an updated drawing to clarify the scope of your proposed changes in light of the above discussions.

Kind Regards,

Michelle Good CMLI
