December 22, 2010

Dear sir / madam,

I make this planning application retrospectively, as building work is complete.

The plans were looked at by the planning department, (Feb.2010).

It was agreed that they met the planning criteria, apart from the exterior finish.

The main building is cement rendered and painted in cream.

The new work is clad in English oak boarding, which will weather, mellow in time to blend in esthetically with the natural surroundings .

This building is not on the public highway, and cannot be seen from the road. It can just be seen above the front hedge, (private lane), but is then covered by a mature Wisteria, of some twenty five years old.

Please find enclosed photographs showing all aspects of this new work. Please note the mature Oak trees in the back ground.

I hope you can, after looking at the overall picture (plans, photographs, site visit,) you will come to successful decision on this matter.

Yours sincerely
