23 August 2010

Havant Borough Council,
Planning dept.,

FLOOD RISK ASSESSMENT.
14, MEATH CLOSE, HAYLING ISLAND, HANTS.
SINGLE STOREY SIDE AND REAR ADDITION WITH BALCONY OVER.

The proposal is for a single storey addition and internal alterations, the floor level being no lower than the existing dwelling and built in solid construction.
Plug and switch heights will be set well above floor level and wired downwards and the property has a first floor where the occupants can take refuge in the event of a flood and there will be no increase in the number of bedrooms. It is therefore maintained that this proposal will in no way increase the pressure on emergency services in the event of a flood.
Should you require any further information do not hesitate to contact me.

Yours sincerely,

[redacted]
