Which have been approved in principle by the Street Lighting Section of Hampshire County Council's Economy, Transport and Environment Department, subject to satisfactory survey and risk assessment at site by the developer's supervising engineer.

*NB: By the acceptance of this document for approval, you are agreeing to act in accordance with HCC guidance for the street lighting processes and ongoing maintenance following installation, prior to accrual. This can be found within developer information pages on Hantsweb and more specifically the current street lighting guidance **TG13**.*

<https://documents.hants.gov.uk/transport/TG13TechnicalGuidanceNote-StreetLighting.pdf>

1. The developer/ site / Project owner must notify HCC Street Lighting Section of the extent of works involving existing illuminated street furniture on the public highway, at minimum 20 days before commencement for works for inventory de-accrual, where ownership is passed to the developer or those who are undertaking Highway works and again to be notified immediately following completion submitted the documents noted in TG13.
2. Prior to adoption for maintenance by Hampshire County Council, it is the developer's responsibility to make arrangements with Mayflower/SSE for the daily

switching of lighting units by remote control (and to annotate each installed mayflower node reference number to the specific column installed upon).

3. Any Non-Standard Apparatus which will require Commuted Sums (see TG13 guidance and HCC Commuted Sums register online).
4. Those undertaking works by forwarding the design for approval act in accordance with the ILP guidance note for the reduction of obtrusive light, carry out consultation with all nearby residents concerning increased levels of lighting and hold responsibility in dealing with any intrusive light issue prior to adoption.
5. Please Note: **This certificate has an approval validation period of one year from the date of acceptance** noted below to date of construction, this is due to the rate of technology development within the industry, after this date a further check should be made with the HCC Streetlighting team to ensure the approved equipment has not become obsolete.

**On Completion of installation, when forwarding for inspection to meet the requirements of HCC TG13 guidance**, the equipment is expected to have been reviewed by the developer and submitted in defect free condition, installed as approved and has the (final) id number displayed, as agreed by the Street Lighting Team at HCC for adding to inventory.

**The Submission prior to pre-accrual inspection, must include: -**

- i. A full set of electrical test certificates (signed dated, with duration of test period - detailing the specific Road / footway section and HCC agreed unit id reference) for all: -
  - a. All street lighting,
  - b. Illuminated signs (with details of equipment and sign face),
  - c. Feeder pillars and private supplies.
- ii. An annotated document, noting road section unit id number and type with the Mayflower numbers installed on the lantern / unit.
- iii. As-built drawing incorporating the correct agreed positions of all lighting, signs, ducting private cabling and feeder pillars.

*C. Blandford*
