

Thank you for the opportunity to comment on this discharge of condition.

Condition 9:

Prior to the commencement of development details of no dig surfacing in the vicinity of trees to be retained shall be submitted to and approved in writing by the local planning authority. In addition a site meeting shall take place with the Council's Arboricultural Officer to agree the position and design of the protective tree fencing prior to the commencement of the development. The development shall thereafter be carried out in accordance with the no dig surfacing and with the protective fencing in place.

Reason: To ensure the retention of important trees in the interests of the character of the area and the amenities of the development having due regard to policies CS11 and DM8 of the Havant Borough Local Plan (Core Strategy) 2011 and the National Planning Policy Framework.

Having looked at the numerous documents available to view on the HBC website, I cannot see any reference to a document that specifically addresses condition 9.

Are you able to steer me towards the correct document if it is present please?
If not, would it be possible to contact the agent and secure the necessary information regarding the no dig surfacing.

I would be pleased to comment further upon any arboricultural details that may be submitted.

Kind regards.

Dave
