Dear Tina,

Petrol Filling Station, 97 Park Lane, Bedhampton, Havant, PO9 3HQ

Installation of 2No. prefabricated enclosed jet wash bays

I refer to your consultation in respect of the above.

The Highway Authority do not believe this proposal will significantly increase traffic flow during the peak travel times as users will more than likely be on the network. That said, there is an area for consideration that does not appear to have any information provided, that is drainage of the bays. This site has the normal interception drainage for surface water that should stop surface water from entering the highway. But the used water from this activity should not enter the on site surface water system either.

Perhaps a condition seeking the drainage details to be submitted to and approved by the LPA prior to construction commencing could be added to any positive decision the LPA may issue. Other than that the Highway Authority have no objection.

Yours sincerely,

Ray Alborough
