Subject: Langstone Technology Park Reserved Matters application APP/24/00274, further arboricultural comments.

CAUTION: This email came from outside of the council - only open links and attachments that you're expecting.

Good afternoon David,

Looking at the two revised landscape plans, it is heartening to note the genus and species selection has been modified to include trees which may prove to be better suited to the site and surroundings.

I also note the inclusion of a robust specification for tree planting soil volumes and tree planting pits, which seem to be acceptable in arboricultural terms.

My view remains that the tree stock sizes are still too large, leading to an inevitable increase in the maintenance and management burden in order to guarantee successful establishment. However, I must assume the applicant has considered their options carefully in this instance.

I am content that these are positive steps, and thank the applicant for their diligence in this case.

No objections or further comments.

Kind regards.

Dave Harris
Tree Officer – External Works.
Hampshire Arb Consultancy.

My working week is Monday-Thursday.
