

I cannot access the portal at present but I would suggest that in light of proposals for a cycle track on the east side of Langstone Road that the access be changed to give pedestrians and cyclists priority, such as per the photo below which is being introduced throughout the area now (this example from Southampton but similar proposed in Havant, Fareham and Gosport by HCC). If this can work on a busy side road on St Denys Road, one of the main routes east-west across Southampton, it can work here.

Best wishes

Steve Mountain
