Dear Ms L Wells,

Planning consultation: Alterations, extensions and change of use to the single storey offices from single storey B1a office use to 1 No. two storey 3 bed dwellinghouse with alterations to APP/21/01120 to allow for pedestrian access and the reallocation of parking.

Location: Fiscal House, 2 Havant Road, Emsworth, PO10 7JE

Thank you for your consultation on the above dated 19 November 2024 which was received by Natural England on the same date.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

DESIGNATED HABITATS SITES – NO OBJECTION SUBJECT TO SECURING APPROPRIATE MITIGATION

This advice should be taken as Natural England's formal **representation on appropriate assessment** given under regulation 63(3) of the Conservation of Habitats and Species Regulations 2017 (as amended). You are entitled to have regard to this representation.

With regard to European Sites, Natural England does not object to the granting of this permission subject to the advice given below.

Your appropriate assessment dated 06 February 2024, concludes that your authority is able to ascertain that the proposal will not result in adverse effects on the integrity of any of the sites in question. Having considered the assessment, and the measures proposed to mitigate for all identified adverse effects that could potentially occur as a result of the proposal, Natural England advises that we concur with the assessment conclusions.

Your authority has measures in place to manage potential impacts through contributions to an agreed strategic solution which we consider to be ecologically sound. Natural England is of the view that if these measures, including contributions to them, are implemented, they will be effective and reliable in preventing harmful effects on the Habitats Site(s) for the duration of the proposed development.

This advice is provided on the basis that all mitigation measures will be secured as planning conditions or obligations by your authority to ensure their strict and timely implementation for the full duration of the development. Your authority should be assured that proposed financial contribution rates are proportionate to the identified effects of the proposed development, suitably precautionary, and in line with the Retail Price Index, where relevant.

Further Advice: Deterioration of the water environment

As Competent Authority it is your responsibility to ensure that you are confident that there is sufficient information to support the values used in any nutrient budget calculation that supports this application, and that any nutrient budget calculation(s) are correct.

Nutrient Budget – Bespoke Occupancy Figure

Where any bespoke occupancy value has been used within the nutrient budget calculation, it is Natural England's view that competent authorities may choose to adopt bespoke calculations for detailed planning applications, if sound evidence is available. These are matters for each competent authority. Natural England's advice is to take a precautionary approach that recognises the uncertainty.

Package Treatment Plant

Please note that for any budget that includes use of an onsite Package Treatment Plant (PTP), yourselves as competent authority should be satisfied that any bespoke effluent discharge figure has been suitably evidenced. This could be through using a performance test certificate, via adequate robust real-world monitoring data (minimum 12 months representing typical operation), or if these are not available then through use of the precautionary default figure within the nutrients budget calculator. The planning application should be supported by a PTP monitoring and maintenance plan. Please refer to the Environment Agency for comments on wider environmental consideration associated with PTPs and any advice in relation to permits.

SUDS

Where calculations include removal of nutrients through on-site Sustainable Urban Drainage Systems (SuDS) it is essential for your authority to verify that the necessary supporting evidence has been submitted, as that forms the basis for the SuDS calculations. As highlighted in the guidance that accompanies the calculators on Gov.uk, Natural England advises that SuDS calculations should be undertaken in accordance with CIRIA guidance (C808 – Using SuDS to reduce phosphorus in surface water runoff (2022) and/or C815 – Using SuDS to reduce nitrogen in surface water runoff (2023)).

In addition, the SuDS features require management in perpetuity. Your authority must ensure that a robust ongoing management plan is appropriately secured and is enforceable in any planning permission given.

For any queries regarding this letter, for new consultations, or to provide further information on this consultation please send your correspondences to consultations@naturalengland.org.uk.

Yours sincerely ,

Camilla Davidge
