

Hi Leanne

Your below email relates to (i) nutrients; and (ii) drainage. Our response is set out below.

Nutrients

Aluco Ecology Ltd has prepared an addendum report (attached) which updates the nutrient neutrality assessment and details the information necessary for the Competent Authority (Havant Borough Council) under the Habitat Regulations 2017 (as amended) to undertake a Habitat Regulations Assessment of the scheme following a query from Havant Borough Council consultant's, Capita, on the 21 October 2022 regarding the size of the Application site included in the nitrate assessment.

An updated Nitrate Calculation is also attached.

Drainage

MJA has prepared a response to the LLFA's comments, which response included a number of appendices.

The information follows in email 2 of 2 and I would be grateful if you could forward to the LLFA for their agreement.

The response demonstrates the acceptability of the drainage strategy, with details to be secured by condition (given this is an outline application).

I trust the above assists and no doubt you will let me know should you have any Qs.

Best wishes

Steven Brown BSc Hons DipTP MRTPI
