

APP/21/00893 Land North of Long Copse Lane Planning Application Objection

FAO: Mr Adrian Ellis

Further to my previous objection to the above development, I recently received further correspondence from the council regarding updated details provided by the applicant.

I have reviewed the updated plans and strongly object to the proposals.

The proposed changes to the road layout including widening of Long Copse Lane heading into Hollybank Lane fail to take into account the practicalities of transport to and from the proposed housing development to the east. This road is too narrow to accommodate the likely traffic volume (road vehicles) and the junction with North Street in Westbourne is difficult enough to negotiate safely at present with lower volumes of traffic.

In addition, I find the council's decision to ignore the Government Inspectors' findings that the Havant Borough Council Local Plan is unsound and not legally compliant unacceptable.

This development remains wholly unsuitable for the local area for the reasons I stated in my previous objection and this update to the proposal fails to address these issues and those raised in this email.

My objection to these proposals remains and I wish it to be noted.

Kind regards
