Dear Sir/Madam,

**Approval of Reserved Matters in respect to Phase 1 Plot 5 of APP/17/01324 (new employment uses, hotel and access road) comprising construction of 3no. B8 storage and distribution units totalling 6,877sqm for Condition B3(i) - (v) plot access, layout, scale, appearance & landscaping; Condition B5 Other Matters criteria (a) - (i) inclusive; and Discharge of Conditions A3, A5, A10, A17, A18, B9 & B10; incorporating revisions to previously approved Parameter Plans forming part of the Environmental Statement dated March 2012 for APP/12/00338, as amended by PP/17/01324. at Phase 5, Dunsbury Park, Fitzwygram Way, Havant (Application No. APP/21/01267**

Hampshire County Council as Lead Local Flood Authority has provided comments in relation to the above application in our role as statutory consultee on surface water drainage for major developments.

In order to assist applicants in providing the correct information to their Local Planning Authority for planning permission, Hampshire County Council has set out the information it requires to provide a substantive response at <https://www.hants.gov.uk/landplanningandenvironment/environment/flooding/planning>

The County Council has reviewed the following documents relating to the above application:

- Dunsbury Hill Farm Surface Water Drainage and SuDS Strategy dated May 2015
- Royal HaskoningDHV Surface water Drainage Strategy Technical Note ref: TN001-PB2348-310055-Egha- Rev A
- Covering email from Savills dated 18 May 2022

*Director of Economy, Transport and Environment  
Stuart Jarvis BSc DipTP FCIHT MRTPI*

It is understood from the information provided that the overall discharge rate has been considered as plots 4 and 6 from the original application with an overall allowable discharge rate of 18.72l/s.

As such, our previous point is considered to be addressed and we have no objection to this application.

As a statutory consultee, the County Council has a duty to respond to consultations within **21 days**. The 21 day period will not begin until we have received sufficient information to enable us to provide a meaningful response.

Please ensure all data is sent to us via the relevant Local Planning Authority.

For guidance on providing the correct information, we recommend you use our **Surface Water Management Pre-application service** which provides clear guidance on what is required for us to recommend that planning permission is granted and consider the works as best practise. For full details, please visit: <https://www.hants.gov.uk/landplanningandenvironment/environment/flooding/planning> and click on [pre-application advice request form](#).

This response has been provided using the best knowledge and information submitted by the applicant as part of the planning application at the time of responding and is reliant on the accuracy of that information.

Yours faithfully,

Flood and Water Management Team  
Economy, Transport & Environment Department,  
Hampshire County Council, 1st Floor, Ell Court West,  
The Castle, Winchester, Hampshire SO23 8UD  
Web:

<https://www.hants.gov.uk/landplanningandenvironment/environment/flooding>

### **General guidance for the application**

*It is important to ensure that the long-term maintenance and responsibility for Sustainable Drainage Systems is agreed between the Local Planning Authority and the applicant before planning permission is granted. This should involve discussions with those adopting and/or maintaining the proposed systems, which could include the Highway Authority, Planning Authority, Parish Councils, Water Companies and private management companies.*

For SuDS systems to be adopted by Hampshire Highways it is recommended that you visit the website at:

<https://www.hants.gov.uk/transport/developers/constructionstandards> for guidance on which drainage features would be suitable for adoption.

Where the proposals are connecting to an existing drainage system it is likely that the authorities responsible for maintaining those systems will have their own design requirements. These requirements will need to be reviewed and agreed as part of any surface water drainage scheme.

### **Works in relation to ordinary watercourses**

PLEASE NOTE: If the proposals include works to an ordinary watercourse, under the Land Drainage Act 1991, as amended by the Flood and Water Management Act 2010, prior consent from the Lead Local Flood Authority is required. **This consent is required as a separate permission to planning.**

Information on ordinary watercourse consenting can be found at the following link

<https://www.hants.gov.uk/landplanningandenvironment/environment/flooding/c/hangewatercourse>

It is strongly recommended that this information is reviewed before Land Drainage consent application is made.

For guidance on providing the correct information, we recommend you use our **Ordinary Watercourse Consents Pre-application service** and help avoid delays occurring at the formal application stage. A Pre-application service for Ordinary Watercourse Consents is available, allowing consents to go through in a smoother, often more timely manner. For full information please visit:

<https://www.hants.gov.uk/landplanningandenvironment/environment/flooding/c/hangewatercourse>
