7 Planning Considerations

7.1 Having regard to the relevant policies of the development plan it is considered that the main issues arising from this application are:

- Whether the degree of pruning works requested would undermine the amenity value of these trees and whether this could also be harmful to their ongoing health and vitality.

7.2 My inspection related specifically to assessing the proposed works rather than generally inspecting the tree's health and condition in any great detail. I visually inspected the tree from ground level and the following report deals with the relevant issues that have been raised on site, in the application form and from my site observations.

7.3 The tree in question makes a positive contribution to local amenity. The reason

provided for the work relates the tree being 'over-mature with a squirrel hole in main stem' but insufficient evidence has been provided to justify its removal. If the condition of the tree is a concern, written arboricultural advice or other diagnostic information from an appropriate expert will be required.

8 **Conclusion**

Refuse

9 **RECOMMENDATION:**

That the Head of Neighbourhood Support be authorised to **REFUSE TPO CONSENT** for application APP/22/00263

(A)

(B) for the following reasons/subject to the following conditions

- 1 The tree is a significant feature in the local landscape and appears to be in adequately sound and healthy condition. Its proposed felling would result in undue loss and detriment to the visual amenities of the locality. [A more appropriate course of action would be through management of the tree's size and impact through a scheme of approved surgery.] It is therefore contrary to policy DM8 of the Havant Borough Local Plan (Core Strategy) 2011 and the National Planning Policy Framework.
