

Planning and developing committee Havant.

I have read all the public objections listed to the extension proposed of the reconstruction of the property listed at 10 Marjoram Crescent, PO8 9BD and it would like it to be noted that I am in full agreement with them all.

I would like to comment on the latest addition the Application ie PARKING_PLAN-1908617.pdf.

This drawing shows how the applicant intends to park at least three vehicles. One in parked in the present garage. At this point I will say the garages attached to the bungalows (built in the 1950s) on this estate are too small to house modern cars with the exception of small saloons cars. The other two would be parked said by side in front of the garage .The spaces 2 and 3 on the drawing do not reflect the large size of the vehicles presently parked at the property or how the drivers would access those vehicles. The proposer has at this time has solved the parking problem by removing the wall at the front of the property, levelling the garden and laying a layer of gravel to support the weight of the two vehicles as shown in the two pictures attached to this document.

The developed property would have two double bedrooms and three smaller bedrooms which gives the impression of large family with adult members and the likelihood of further parking required on Marjoram Crescent and adjacent roads.

Without proportioning blame I would like to point out the damage to the curb stones and grass verges in Marjoram Crescent caused by vehicles overriding the curbs.

I object to the above application on the above grounds.
