APP/15/00476 - 42 Bedhampton Hill

Richard

The supporting arboricultural evidence (Phil Brophy – Barrell Tree Consultancy) is comprehensive and outlined in the following points:

Minimal tree removal is required to facilitate development. (Some trees are no longer in place since the report was written)

Tree planting as well as other landscape features must be added to enhance this site and these should adequately mitigate the loss of any current trees from this site. (A tree planting scheme should be agreed with the Council)

Provided that the methodology prescribed in the AMS & TPP report is strictly adhered to and a site monitoring exercise is undertaken I would expect the retained trees to survive the development unscathed and to continue to grow on in the future.

Therefore I have no objections to this scheme in arboricultural terms.

Thanks
J

Hello Jamie

Please could you look at the AIA and MS for this application?

Thanks

Richard
