

Dear **Ms L Wells**

Application ref: **APP/24/00293**

Our ref: **475729**

Thank you for contacting Natural England regarding the above-mentioned development.

Water quality/nutrient neutrality advice

This proposal potentially affects European Sites vulnerable to nutrient impacts. Please refer to Natural England's overarching advice dated 16th March 2022 and sent to all relevant Local Planning Authorities.

When consulting Natural England on proposals with the potential to affect water quality resulting in nutrient impacts on European Sites please ensure that a Habitats Regulations Assessment is included which has been informed by the Nutrient Neutrality Methodology (provided within our overarching advice letter). Without this information Natural England will not be in a position to comment on the significance of the impacts. For large scale developments, Natural England may provide advice on a cost recovery basis through our [Discretionary advice service](#).

All queries in relation to the application of this methodology to specific applications or development of strategic solutions will be treated as pre-application advice and therefore subject to chargeable services.

Natural England has not assessed this application for impacts on protected species. Natural England has published [Standing Advice](#) which you can use to assess impacts on protected species or you may wish to consult your own ecology services for advice.

Natural England and the Forestry Commission have also published standing advice on [ancient woodland and veteran trees](#) which you can use to assess any impacts on ancient woodland.

We recommend referring to our SSSI Impact Risk Zones (available on [Magic](#) and as a downloadable [dataset](#)) prior to consultation with Natural England. Further guidance on when to consult Natural England on planning and development proposals is available on gov.uk at <https://www.gov.uk/guidance/local-planning-authorities-get-environmental-advice>.

Yours sincerely,

David Reid
