

Hi Charlie,

Further to our conversation on the phone, I'd like to reassure you that the BS3882 Topsoil that has been supplied to your Havant project relates to the Tim O'Hare certificate you have received.

We supply a 20mm BS3882, as well as a 10mm BS3882 and the only difference between the products is the screening size of the compost within the blend.

The material you have on site is the 10mm BS3882, despite the weighbridge ticket stating otherwise.

Many thanks
