

I write to you with regard to proposed development of 175 apartments @ Barton's Rd. I oppose the development vehemently and have a number of concerns around the development.

- Barton's Road is already heavily congested now from morning to night especially with the recent developments opposite the cremation area which is only a few percent complete. Lorries, cars, biked, you name it have all increase significantly. A sign of that if the time you now wait at the traffics lights from Petersfield Rd to Batons Rd, you never ever ever get through in one go during day time, try it yourself and see how you get on 😊
- The housing development @ Colt will bring further congestion.
- I tried to access the plans on your website but there are millions of them, I gave up on the will to live. How are you proposing that the residents access the new development? Traffic lights or are you just going to just let those entering from the Petersfield Rd direction indicate right and hold up the traffic behind them? Probably not the best of ideas
- Barton's Road tarmac is in need of repair, take a look yourself
- The (redacted) will probably nick all the residents cars when they arrive in the summer as is now the case and park on Barton's Green by the skate park
- Where are all the kids going to go to school?
- Where are all the people going to shop?
- Can I have a rebate on the congestion that all the planning has caused me and the mess it makes to the front of my house pollution and dirt wise?
- One more thing, who gave permission to destroy all the hedges that were on the electricity site? Did you see what they did? Complete act of vandalism, can I see the approval form to do that or do the developer just do it?

Finally, is there anywhere now in this area that you wouldn't consider building on? Just a question really and I guess the answer to that is "No, not at all, we will sell anything to make a profit (redacted)
