

Dear Ms Wells,

Thank you for your email advising of revisions made to the planning application re McCormack House Havant. Unfortunately I was unable to open the documents referred to in your email and due to family illness unable to give this matter my full attention until today, therefore apologies for my delay in replying.

I am given to understand that several residents have requested a public consultation re this application which to my knowledge has not occurred.

I have been advised that plans have been proposed re management of traffic, namely taxis, accessing the proposed school (McCormack house) with regards to dropping off and collecting pupils and informed that a two way road system has been suggested to do this. Unfortunately I have not received any official documentation confirming this. However if this information is correct I object to the proposal on the grounds that it would be unsustainable long term and presents further risk to traffic and pedestrian's crossing at this location.

As you will be aware several roads filter into Emsworth road from outside the Spring art centre. The bus stops outside which limits view of passing vehicles and traffic crossing the bridge, often doing so at speed, have limited visibility of cars/ pedestrians on the other side until they hit the brow of the bridge.

I believe that objections have to be submitted by 15.04 and therefore I am writing to reject the proposed amendment's. I look forward to hearing from you in due course.
