

Good afternoon Denise,

Please consider this email as a consultation response from Arboriculture on the above planning application following the amendment to the proposals.

There are a number of trees onsite, but none of any significance likely to be adversely affected by the proposals. An arboricultural report has been submitted with the application in which various protection measures have been specified to minimise the impact on these trees during the construction process. However, it relates to a previous scheme.

Recommendation:

I raise no objection to the proposals and if you are minded to permit the application, I would recommend that a suitably worded pre-commencement condition is imposed requiring the applicant to submit Arboricultural information to demonstrate how the construction will proceed without causing harm to trees and/or a suitable specification for replacement tree planting as mitigation for any trees that require removal in order to facilitate this development.
