Dear Gary,

Planning consultation:
Location:

Thank you for your consultation on the above dated 07 October 2022 which was received by Natural England on the same day.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

SUMMARY OF NATURAL ENGLAND'S ADVICE

FURTHER INFORMATION REQUIRED TO DETERMINE IMPACTS ON DESIGNATED SITES

As submitted, the application could have a likely significant effect on:

- Solent and Dorset Coast SPA
- Portsmouth Harbour SPA and Ramsar Site
- Chichester and Langstone Harbours SPA
- Solent Maritime SAC
- Solent and Southampton Water SPA

Your Authority will need to undertake a Habitats Regulations Assessment (HRA) to determine whether the proposal is likely to have a significant effect on the sites named above, proceeding to the appropriate assessment stage where significant effects cannot be ruled out. The following information is required to inform a HRA:

- Consideration of this project's effects on total nitrogen and/or total phosphorus nutrient loading within the Solent catchment, including a nutrient budget calculation.

- Details of proposed mitigation measures to address any nutrient impacts, including appropriately funded management and monitoring, and details of how the measures will be secured for the lifetime of the development.
- Any other likely significant effects that could arise from the development should also be assessed.

Once the above information is obtained, please consult Natural England on any appropriate assessment your authority may decide to make.

Natural England's Approach

As your Authority will be aware, there are impacts on nationally and internationally important wildlife sites in the Solent Catchment arising from excessive nutrients from wastewater discharge. On 9 March 2022, Natural England sent a letter (via email) to the Head of Planning at your Authority, explaining that Natural England is fully committed to working closely with your Authority to develop strategic approaches for delivering a nutrient neutrality to help development to proceed. At this time, Natural England is issuing this standard advice in response to planning consultations / proposals requiring nutrient neutrality that meet the following criteria:

- the proposal is for 150 homes or fewer
- the proposal is not accompanied by a habitats regulations assessment (HRA) which has been completed or adopted by the competent authority.

Standard Advice for Nutrient Neutrality

It is Natural England's view that there is a likely significant effect on the internationally designated sites in the Solent catchment due to the increase in wastewater from new housing. One way to address this is for new development to achieve nutrient neutrality. Nutrient neutrality is a means of ensuring that development does not add to existing nutrient burdens and this provides certainty that the whole of the scheme is deliverable in line with the requirements of the Conservation of Habitats and Species Regulations 2017 (as amended).

We have written to your authority about the availability of an updated package of tools and guidance in relation to nutrient impacts. We recommend that your authority moves to using the updated generic Nutrient Neutrality Methodology and the updated catchment calculators in preference to existing methodologies whether produced by Natural England or your own authority. Your authority will be best placed to consider how it transitions to the new tools and guidance. Natural England recognises that for some existing catchments where nutrient neutrality is being implemented and mitigation is being actively progressed, authorities may need to consider the associated practicalities of moving to the new guidance whilst recognising their role as Competent Authority.

The supporting information for this proposal should include a nutrient budget and details of any proposed mitigation to address nutrient impacts. To demonstrate that proposed mitigation will remain effective for the lifetime of the development, information on management and monitoring will be required, together with details of how this will be secured and funded in perpetuity. This information should be considered by your authority in accordance with regulation 63 of the Conservation of Habitats and Species Regulations 2017 (as amended) i.e. through a HRA.

The proposed development, and the application of any measures to mitigate the likely harmful effects from it, should be formally checked and confirmed by your Authority, as the competent authority, via an appropriate assessment, in view of the European Sites' conservation objectives. Further information on carrying out a HRA as a competent authority can be found online¹.

Once a HRA has been completed or adopted by the competent authority, Natural England will review the proposal.

Please note that where the necessary avoidance and mitigation measures are limited to collecting a funding contribution that is in line with an agreed strategic approach for the mitigation of impacts on Habitats Sites then, provided no other adverse impacts are identified by your authority's appropriate assessment, your authority may be assured that Natural England agrees that the appropriate assessment can conclude that there will be no adverse effect on the integrity of the Habitats Sites. In such cases Natural England will not require a Regulation 63 appropriate assessment consultation. However please note it is strongly advised you as competent authority seek your own legal opinion on whether to consult under these circumstances. Further, your authority, as Competent Authority, should consider how the updated Nutrient Neutrality Methodology relates to the budget provided for any strategic mitigation, ensuring it is appropriate to mitigate this development. In all other cases (where impacts from the proposed development cannot be addressed solely by contributions to an agreed strategic approach) you must contact Natural England for further advice on your appropriate assessment. Permission should not be granted until such time as Natural England has been able to consider these impacts and respond.

Additional advice

Further general advice on the protected species and other natural environment issues is provided at Annex A.

Please note that if your Authority is minded to grant planning permission contrary to the advice in this letter and aforementioned letter sent to your Head of Planning, you are required under Section 28I (6) of the Wildlife and Countryside Act 1981 (as amended) to notify Natural England of the permission, the terms on which it is proposed to grant it and how, if at all, your Authority has taken account of Natural England's advice. You must also allow a further period of 21 days before the operation can commence.

Yours sincerely,

Rachael Clemson
Sustainable Development Lead Adviser
Thames Solent Area Team
