RECEIVED

Mr D Eaves
Ref APP/24/00096

Dear Mr Eaves

We write to you regarding the proposed erection of a building for supported housing on whitsbury road Havant and tell you that we are against the project on the following grounds:

1. Firstly we would like to be placed on record that we have a garage on the proposed site which is a working garage and it is used 24/7, as soon as we received the first letter stating that a building was going to be built we telephoned [REDACTED] and explained that we needed access 24/7 to and from our garage and the access road and we were told that she had no idea that we had a garage on the site, she said she will look up the site and get back to us, a few hours later she telephoned us to say that she had looked on google and that our garage was safe and that the security gates will be further down, we explained to [REDACTED] that when we come out of our garage we are unable to go left as the wall sticks out too far and that the kerb opposite is too high and the front end of the car will hit the kerb, for the past 50 years we have come out of the garage and gone right and done a 360 turn to get up the access road, she said to leave it with her and she would speak to the surveyors, to date [REDACTED] has not getting back to us regarding this issue even after we have telephoned her twice and left messages on the answer phone on her mobile .

2. We have noticed that a statement given by Mr Matt Annen stating that the site cannot be viewed from a public highway is simply untrue and he needs to admit the site can be viewed from a public highway by anyone at the top of the access road /public highway or anyone who simply walks past the access road [REDACTED]
[REDACTED]

3. If the application gets the go ahead Will the construction company give me and my wife a written guarantee that we will not be inpeded by construcion lorries on the access road to and from Whitsbury road from my garage which is next to the sse sub station at any time of the day or night during construction ?

Now we will give our reasons as to why we are objecting to the proposed site

1. As we have already stated for the past 50 years we have a working garage which we need access to 24/7 to park our car, to come out of our garage we turn right into the open space and do a 360 turn, we are unable to come out of our garage and turn left because of the wall that sticks out and the high kerb which if we tried to turn left would scratch the bumper so the only way out of our garage is to turn right, having looked at the plans we notice that there will be a security gate which would stop us from turning right or maybe we would have to do a 10 point turn within the space of our garage and the security gate which is simply absurbed, also we would need access to the road, and the sub station to which the size of their vans they would need to do a 30 point turn as the security gate will impeed them as well as us, we have registered and paid the fee to havant council when we built the garage and to stop our access to and from the garage would be unfair so we say no

2. we are concerned about the security aspect of the building being 10 yards to my property and the fact that anyone can lurk in the darkness down the access road, my wife and myself would be severely concerned coming back to the garage

in plain darkness and find someone lurking down there, [REDACTED]

[REDACTED] we are also concerned on the workload of the police and the false call outs they might get and suddenly get a call to say that someone from the building has seen someone only for the police to turn up and find its me, the neighbours will also be concerned about the real possibility of husbands /partners/bfs climbing over there property to gain access to the building to do harm, so we say no

3 we are really concerned about the noise that will be made and the houses being so close to the building work, noise has a serious effect of peoples health , heavy equiment in such a small space will make the noise echo and thus making it sound even worse and we have a human right to a pleasent and noise free envioment, myself I work nights and sleep durning the day do you really think I am going to get any sleep with the noise coming from such a close building work, if I dont get any sleep my health is affected and wont be able to do my job properley and there is a real possibility of me having a accident at work through lack of sleep but not just physical tiredness but mental tiredness too, which there is a condition called SWSD (SHIFT WORK SLEEP DISORDER) which can lead to mood problems, impatient,irritable, at a higher risk of depression, poor work performance, struggle to concentrate, remember things, higher accident risk as shift work decreases alertness and reaction time, many people with sleep problems self medicate with drink or drugs, we all went through hell when we had the pandemic especily mental health so I really do not want to go through a period of having physical and mental health problems, not being able to work, [REDACTED] and stress and mental health is not good I am 100% sure the company are not going to pay for a hotel for me to sleep after my nightwork and certainly not pay for triple glazing windows, so we say no.

4 The dust and the mess coming from the building work will be horrendance, the flowers in our gardens will be ruined by the dust, the lawns will be covered in mess caused by the building work, windows will be dirty on a day by day basis and will the company get a window cleaner in to clean our and the neighbours windows? i doubt it, the dust and the mess will not just be confined to the people living so close to the building work but the dust and mess will be blown further afield to the surrounding area do you think people will want to sit in there gardens while the dirty messy building work is going on?.

There are lots and lots of concernes that this project will bring up and I have learned that nothing goes to plan and expect the unexpected, we are wondering why they are building on such a small area of space when there are bigger and better places within the area that is more suited to them.

We are not against stopdomesticabuse uk we are against the location of the proposed building and all the problems it will bring.

We understand you have a right to consider what they are asking you to do but you also have a right to protect the interests of the people of Whitsbury Road, Nursling Cres and soundering area, WE HAVE TO LIVE HERE AND LIVE WITH IT .

[REDACTED]

WE ARE AGAINST THE PROPOSED ERECTION OF THE BUILDING CONCERNED
