Perfect for residential

Designed for horizontal flow systems with one or two fans and compatible with all air source equipment. Environ Sound Cover has this covered and is ideal for residential applications.

Why use Sound Cover?

Air source heat pumps can be noisy when situated in a domestic setting. Sometimes upsetting neighbours and disturbing sleep. Environ Sound Cover proactively deals with this at source negating noise anxiety and allowing users to enjoy the benefits of their new heat pump.

Seamlessly aesthetic in appearance to ensure minimal visual impact.
