4 Road Safety Audit Decision Log

RSA Problem	RSA Recommendation	Design Organisation Response	Overseeing Organisation Response	Agreed RSA Action
3.1	It is recommended that the uncontrolled crossing be relocated closer to Harts Farm Way where it may be more appropriate in terms of pedestrian desire lines.	Accepted	Vectos South	The location of the uncontrolled crossings can be agreed at the detailed design stage.
3.2	It is recommended that the appropriate hazard warning tactile paving is installed on the western side of the site access junction to notify NMU's of the start / end of the shared use facility.	Accepted	Vectos South	The footway/cycleway on the northern side of Harts Farm Way is proposed to extend into the site. Therefore, the installation of hazard tactile paving to signify the end of the route would mean people accessing the site would need to dismount. It is considered that appropriate signage could be erected to the west of the proposed access junction to notify NMU's of the start / end of the shared use facility. The signage and its location can be agreed at the detailed design stage.
