

I object to the above Planning Application for the following observation;

Hayling Island's infrastructure is already overstretched. There is only the one Bridge for commuting traffic and any increase will lead to unacceptable conditions and associated pollution. Any single dwelling potentially leads to two or more vehicles.

Schools, Medical & Dental Surgeries, and Shops are already stretched.

The Government's Inspectorate has already declared that the level of Development is unacceptable. APP/17/00007 was for 210 properties. this one is for more....300!

Services to the Island will suffer. In July of 2021, Southern Water were fined £90,000,000 for discharging untreated water into Langstone Harbour and polluting Farlington Marshes Nature Reserve and Hayling Shoreline and Beaches. Any more Development on Hayling can only impact the situation further.

Solent Waders and Brent Geese will lose a designated Core Area.

There is an Infant's School in St Mary's road. Young Children's lives will be seriously put into an increased danger because of the additional Traffic flow which will, inevitably follow.
