

Dear David, yes you are quite correct. Condition 18 can be discharged and condition 19 should still secure the production of a report /publication, thanks, David

Planning Application APP/20/01093 Land at Sinah Lane, Hayling Island condition 18

Thank you for your consultation. I note that in relation to the archaeological condition it is requested that the constraint of the archaeological exclusion zone be removed. I would endorse this.

With regard to the progress of the implementation of the archaeological condition I can confirm that the archaeological field work stage has been completed and that there is no practical archaeological impediment 'on the ground'. However the results of the archaeological excavation will need to be reviewed and a report prepared and submitted. In my opinion it is likely that the content of the report will be of sufficient community interest as to merit some note to be prepared for inclusion in the Proceedings of the Hampshire Field Club. Once this reporting has been completed, or unambiguously secured, discharge of the archaeological condition might be considered.

Yours sincerely

David Hopkins
