

11 Brent Court

Sketch map^

Proposal of work

T1: Acer psuedoplatanus approximately 11m in height –
To reduce in height by 5 meters and spread by 2m

T2: Acer psuedoplatanus approximately 12m in height –
To reduce in height by 5 meters and spread by 2m

T3: Acer psuedoplatanus approximately 11m in height-
to reduce in height by 4m and spread by 2m

T4: Acer psuedoplatanus, approximately 10m in height –
to reduce in height by 4m and spread by 2m

Arboricultural implications

The proposal of works for each tree (T1, T2, T3, T4) stated above is due to the relative size (mostly concerning the height) when compared to the gardens and can be explained here for all the trees listed because the implications are the same.

The proposed work is due to excessive shade to numbers 10, 11 and 12 Brent Court and 60, 61, 62, and 63 Maisemore Gardens. The size of these gardens is very small in proportion to the trees and having walked around the properties I expect living under such trees to be nuisance for all the residents nearby.

Sycamore is a large deciduous tree more akin to a woodland than smaller town gardens such as these, where they could grow to be as large as they should be. Whether planted or self-seeded they have grown to a great size and now oppress the locale.

I would suggest this reduction in height to alleviate some of the nuisance while retaining the trees for vital habitat, and I have advised my client that an ongoing pruning cycle should be carried out as a proactive measure to mitigate risk thereafter.

I would suggest this reduction in spread mostly to leave the trees with a better shape, as well as reduce some of the shading caused.

The trees should respond well to the work as they are of good health and vitality, and the species is well known for its vigorous regrowth.

My calculations of the overall height of the trees should be a close approximation and I intend to leave T1 and T2 slightly above the level of the roof to the East, this will retain the amenity value for residents farther away. I intend to leave T1, T2, T3 and T4 visible From the West from Maisemore Gardens as the roof height is lower.
