

Tournerbury Wood Planning

Dear Mr Weaver,

I am totally confused by the current planning situation surrounding Tournerbury Woods application (APP/21/01310) to turn the site into a wedding and holiday site and its adjourned status. The application for change of use was rejected and I believe a stop notice was issued and still events continue. Please could you add the following objection to the appropriate retrospective planning application.

This site is an SSSI, it adjourns an AONB and is an important area for bird life. How can a wedding venue, run out of a marquee and a holiday business be compatible with these designations. Weddings/events are noisy, involves lots of people with cheering, music, lighting and the need significant levels of traffic movements. These attributes are simple not compatible with the designation of the site and associated wildlife.
