

Specialists in UPVC & Aluminium
Conservatories, Doors, Windows, Bifolds and Replacement Roofs

To whom it may concern

Project : 3 Harbour Way, PO10 7HE

We can confirm that the products being used on the above project are from the REHAU TOTAL70 range of door and window profiles.

The REHAU TOTAL70 window system comprises a range of multi-chambered profiles that are designed to meet the requirements of the new build, commercial and domestic refurbishment markets.

Within the system there is a choice of profile designs. REHAU TOTAL70C is a chamfered system resembling a traditional 'putty line' finish. The chamfered system is simple yet elegant, helping to create beautiful contemporary frames.

For over 30 years, Solent Glass have been using REHAU profiles which have been enhancing lives as the TOTAL70 window and door system helps make our customers' homes healthier, safer and more comfortable.

The TOTAL70c system is available with a co-extruded profile made up of 75% post-consumer waste. It boasts severe weather performance credentials and unparalleled technical, thermal and noise reduction efficiency.

Full details of the specification can be found in the attached brochures from Rehau
