Commenter Type: Complainant

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment:- All the proposed housing on the west on the island will all significantly increase traffic on West Lane. This lane is a country lane with no paths.

- West Lane feeds on to the one main road on and off the island (via the only bridge). The joining the main road from west lane is becoming extremely dangerous due to bends in the road near the exit.
- Congestion on to and off the island is already appalling.
- Pollution will increase with the amount of vehicles using the roads
- Congestion in Havant is caused due to traffic trying to get onto the island (often the Langstone roundabout is stationary). This gets significantly worse in the summer.
- Deliveries, accidents, breakdowns or essential maintenance even refuse collections on the one road off/on causes enormous problems.
- The bridge was not built for the volume or size of the traffic now
- The sewage system will not cope, previous problems had to be solved by tankers.
- Hayling wild life will disappear completely, we have deer, foxes, bats, buzzards, owls ,pheasants etc. They cannot move on to other fields, we are an island, there is nowhere for them to go.
- Schools are overwhelmed now.
- Doctors etc. are overwhelmed now.
- Fields being developed are green sites and prime agricultural fields. We should not develop these fields, as a country, we need to grow more of our own food to combat future food shortages
- These developments will not increase jobs as due onto the current infrastructure it will deter any business from moving or expanding here.
