

Thank you for your patience whilst we have reviewed and collated information on the cycle storage in relation to our original submission acknowledged in the attached letter. Following feedback on our original proposals which were deemed not suitable, we have taken into consideration your comments and have revised the provision as follows:

- Individual cycle stores to the rear gardens of all houses
- Communal long stay cycle storage to be timber clad enclosures with two tier cycle racks
- Short stay visitor cycle storage no change

Attached to this email is a material schedule which outlines in detail the proposed provision for long and short stay cycle storage across the development. Also attached is revised drawing CIE MHA 0123 P05 Site block plan cycle storage provision indicating the location of the cycle stores, a plan of the street lighting layout to demonstrate lighting provision around the communal storage facilities and further product literature. All in order to inform a discharge of condition 12 of the Reserved Matters application.

If you have any queries relating to the content of this email please do get in touch.

Kind regards

Sophie Ayling
