

We have received the attached letter in relation to a Change of Use application (ref. APP/21/01406) at Dobbies Garden Centre, Bartons Road, Havant.

In terms of the elevation plans, the request for these is clear and they will be submitted in due course.

With regard to providing parking provision details, there is no specific designated/separate parking to be provided as part of the application proposals (proposed change of use of part of existing buildings). As set out in the application, the Veterinary Practice will have access to the whole of the existing garden centre car park for use by staff/customers/visitors as part of the existing operation of this site. As such, we do not consider this information needs to be required for this application, and there is not any separate plan that could be provided – the existing available parking area is as shown on the submitted location plan.
