

The addition of the Metrotile granular galvanised steel pantile profile roof tiles transforms our Pent range.

Adding another dimension to the front elevation, the Mansard roof adds kerb appeal and in a choice of six colours. This is in addition to our unique C Section galvanised steel rafters for greater strength and rigidity.

Galvanised steel one piece roof sheets means no joins*, so no leaks and anti condensation treatment ensures best performance. The Hörmann fully retractable, fully pre-framed door ensures perfect fitting every time.

Our Bespoke Options allow you to personalise your building. Spar, Brick or Stone effect panels, site applied Textured finish, Garaclad PVCu cladding, RealBrick front posts and the full range of bespoke options ensure that you can choose the right building for your house, which will enhance its value, minimise insurance costs, and maximise kerb appeal. Upgrade the PVCu fascias and windows with the upmarket Decograin finish, look at our Mansard Premium Option package and save money.

*up to 20'6 long

Tip

Choose a wider building than you think you need, so you have somewhere to park the bike, put the ladder or whatever else you store.
