29th September 2021 —

Dear Miss Donophy,

GARAGE COURT AT LOCKERLEY ROAD, HAVANT, PO9 2HB

Thank you for your letter of the 21st September 2021, and the opportunity to comment upon the application. Having considered the application I have the following comments to make with reference to the prevention of crime.

Further to my letter of the 28th July 2021.

The proposed lighting plan does not provide an even level of light across the car park area. The height and position of the luminaries has caused the centre of the car park, where pedestrians will be walking, to be lit to a lower level. High sided vehicles using the parking spaces will further reduce the level of light reaching the centre of the car park. The height and position of luminaries and the level of light in areas of the car park will make identification of an individual difficult. The lighting design should comply with BS EN 12464-2. I understand, that this should provide a minimum maintained illuminance of 5 lux, with a uniformity figure of 0.25.

Closed Circuit Television (CCTV) cameras are shown at opposite corners of the parking deck and at the top of the ramp. From these positions it is possible to view some of the parking deck and the accesses. The height of the cameras is not shown, however, high sided vehicles using the car park may limit the view of the cameras. The cameras should be mounted in such a position that their view is not limited by vehicles using the car park. To improve the view of the car park I would recommend that 360° mega-pixel cameras are installed.
