**Available at extra cost

Dynamic Power Management

Dynamic Power Management makes sure that the available electricity capacity of your grid connection at home is dynamically balanced and distributed in realtime between household devices and charge point. This service requires additional hardware and is available in combination with Home Advanced and available at extra cost.

Business

Our line of business charging solutions are perfectly suited to any workplace, destination and depot for EV charging needs. With its ability to control up to 40 charge points, our Business Pro is the ideal centre of your charging infrastructure. Build out your solution with our Business Lite units for optimal cost-efficiency.

*Available at extra cost		

Tethered cable

Make depot or fleet charging even simpler by adding a tethered cable to your charge points. By removing the need to take out personal charging cables, employees and guests can start a charge even faster. Available with a Type 2 connection with a cable length of either 5 or 8 metres for all business charge points.

Advanced services

Dynamic Power Sharing

Use the available power of your grid connection optimally with Dynamic Power Sharing.

This unique service enables automatic distribution of the available power of your grid connection to all connected charge points, ensuring optimal efficiency.

Group Charge App

Optimise the utilisation of company charge points. With the Group Charge App, employees can directly communicate with each other in a closed user group via a chat functionality, check the up-to-date status of the company's charge points, see who is charging, get notified when charge points are available or ask other colleagues to move their fully charged car.

Business Hub

Easily monitor, manage and control your complete EV charging infrastructure across multiple locations from one central platform. Features such as remote access, tariff setting and cost allocation allow you to create the optimal setup for your business and make EV charging management easy.

Colours

Choose the colour of your charge point. NewMotion charge points come standard with a white front cover (RAL 9010) and a grey back cover (RAL 7031). Select from our 3 standard colour variants or go bold to promote electric driving. You can even select a custom colour to match your home or company brand colours.

White
