

We have reviewed the information provided and given that this relates to ecological elements rather than management of surface water, do not have any specific comments in terms of Condition 19.

The only point we would like to raise is that it is not clear whether these works are in relation to the Main River or an ordinary watercourse.

If the proposals include works to an ordinary watercourse, under the Land drainage Act 1991, as amended by the Flood and Water Management Act 2010, prior consent of the Lead Local Flood Authority is required for this work. This consent is required as a separate permission to planning. Details can be found

<https://www.hants.gov.uk/landplanningandenvironment/environment/flooding/changewatercourse>

If the works are in relation to the Main River, the Environment Agency would be the regulatory body.

Regards

Sarah
