Arboricultural Impact Assessment/Statement For Tournerbury Wood Hayling Island PO11 0EH.

1. Arboricultural Method Statement and Impact Assessment

The proposal for the Venue Area in Tournerbury Woods, Hayling Island.

The following Arboricultural method statement is to provide a protection strategy for the trees adjacent to this proposal. The tree survey shows the area of proposal. The site is a mature woodland adjacent to the proposal mainly mature Oaks, Yew, Beech, Hawthorns and various specimen as detailed in the schedule. In general, the venue area shows some evidence of historical tree maintenance in the previous years. The tree survey recommends minimal work to be undertaken adjacent to venue which is relevant to normal management of a mature Oak woodland.

- 1. The proposal to maintain the existing venue area would not have an impact on the trees adjacent.**
- 2. With reference to a woodland management plan. This would not be applicable to this location as the trees adjacent to the venue areas should be managed individually and resurveyed on an annual basis.**
- 3. Recommendations in this survey should be undertaken on an annual basis.**
- 4. There will be no fires within the venue areas except in the designated fire pit area.**

Tree Survey: Schedule Undertaken by Arboricultural Consultant Kim Gifford 29th October 2018
In fine weather conditions.

Method: Visual Tree inspection references, Principles of Tree Hazard Assessment and Management by David Lonsdale and The body language of trees by Claus Mattheck and Helge Breuer. The Arboricultural Association guidance note 7 tree surveys a guide to good practice. Lantra award Professional tree inspection. BS5837: 2012 Tree in relation to design, demolition, and construction recommendations.
