

FAO Mr J Toole.

Dear Mr Toole

Following on from your letter ref APP/21/01257 dated 25th November concerning the above mentioned Development please be advised that we in general principle have no objections to the proposals with the exception of : -

The full height Cathedral style window within the rear west elevation to which we consider impinges upon our privacy in respect of the overlooking to our rear garden area that would be to a greater extent far more than provided by the 2 No smallish windows that currently exist.

Therefore we would have no objections whatsoever if this particular window in question was moved from the west to south elevation that in turn would provide the property owners of No 11 Southleigh Road with a far better and more interesting internal perspective of the new vaulted roof but also and probably more importantly provide them (Nb : as south facing) a constant stream daylight to the Master Bedroom from dawn to dusk.

Finally trust that you will find the foregoing self-explanatory and all in order.
