

Heritage Team Response

Date – 6/1/2022

APP/21/01302 (LBC) –41 South Street, Emsworth

The application description

Listed Building Consent for 1 new staircase, to replace 2 old internal staircases.

The Site

The application site is located in South Street within Emsworth Town Centre and within the conservation area boundary. The site is a C18 building known as Trinity Cottage, at No. 41 South Street. The building is Grade II listed. The building was originally 3 no. cottages but was combined into one dwelling in the 1950's. As a result, it has undergone a number of changes both internally and externally. The windows are not original, and some historic features have been lost internally. There is a walled rear garden and an original brick built outhouse towards the rear boundary.

Legislative and Policy Context

When assessing the proposal, the following legislation and policy context is taken in consideration. Section 66 of the Planning (Listed Buildings and Conservation Areas) Act 1990 requires planning authorities, when considering whether to grant planning permission for development which affects a listed building or its setting, to have special regard to the desirability of preserving the building or its setting or any features of special architectural or historic interest which it possesses. Section 72 of the Planning (Listed Buildings and Conservation Areas) Act 1990 requires planning authorities, when considering whether to grant planning permission for development which affects a Conservation Area, to have special regard to the desirability of preserving or enhancing the character and appearance of that area.

The revised NPPF (July 2021) sets out in Chapter 16, the core principles relating to development affecting Heritage Assets that local planning authorities should consider in making planning decisions in the following paragraphs:

189. Heritage assets range from sites and buildings of local historic value to those of the highest significance, such as World Heritage Sites which are internationally recognised to be of Outstanding Universal Value. These assets are an irreplaceable resource, and should be conserved in a manner appropriate to their significance, so that they can be enjoyed for their contribution to the quality of life of existing and future generations.

194. In determining applications, local planning authorities should require an applicant to describe the significance of any heritage assets affected, including any contribution made by their setting. The level of detail should be proportionate to the assets' importance and no more than is sufficient to understand the potential impact of the proposal on their significance. As a minimum the relevant historic environment record should have been consulted and the heritage assets assessed using appropriate expertise where necessary. Where a site on which development is proposed includes, or has the potential to include, heritage assets with archaeological interest, local planning authorities should require developers to submit an appropriate desk-based assessment and, where necessary, a field evaluation.

195. Local planning authorities should identify and assess the particular significance of any heritage asset that may be affected by a proposal (including by development affecting the setting of a heritage

asset) taking account of the available evidence and any necessary expertise. They should take this into account when considering the impact of a proposal on a heritage asset, to avoid or minimise any conflict between the heritage asset's conservation and any aspect of the proposal.

196. Where there is evidence of deliberate neglect of, or damage to, a heritage asset, the deteriorated state of the heritage asset should not be taken into account in any decision.

197. In determining applications, local planning authorities should take account of:

a) the desirability of sustaining and enhancing the significance of heritage assets and putting them to viable uses consistent with their conservation;

b) the positive contribution that conservation of heritage assets can make to sustainable communities including their economic vitality; and

c) the desirability of new development making a positive contribution to local character and distinctiveness.

199. When considering the impact of a proposed development on the significance of a designated heritage asset, great weight should be given to the asset's conservation (and the more important the asset, the greater the weight should be). This is irrespective of whether any potential harm amounts to substantial harm, total loss or less than substantial harm to its significance.

200. Any harm to, or loss of, the significance of a designated heritage asset (from its alteration or destruction, or from development within its setting), should require clear and convincing justification. Substantial harm to or loss of:

a) grade II listed buildings, or grade II registered parks or gardens, should be exceptional;

b) assets of the highest significance, notably scheduled monuments, protected wreck sites, registered battlefields, grade I and II* listed buildings, grade I and II* registered parks and gardens, and World Heritage Sites, should be wholly exceptional.

Local Planning Policies

Policy CS11 (Protecting and Enhancing the Special Environment and Heritage of Havant Borough) states that planning permission will be granted for development that:

"Protects and where appropriate enhances the borough's statutory and non-statutory heritage designations by appropriately managing development in or adjacent to conservation areas, listed buildings, scheduled ancient monuments, historic parks and gardens, archaeological sites, buildings of local historic or architectural interest".

Policy CP16 (High Quality Design) (1a) of the Core Strategy states that "Planning permission will be granted for development that is designed to a high standard, which helps to create places where people want to live, work and relax. All development should demonstrate that its design:

Identifies and responds positively to existing features of natural, historic or local character within or close to the proposed development site".

Policy DM20 of the Allocations Plan states that planning permission will be granted for development proposals that conserves and enhances the historic assets of Havant. It also states that application

which affect, or have the potential to affect, heritage assets are expected to provide a Heritage Statement that:

1. Describe the significance of the asset and its setting, using appropriate expertise and where necessary original survey, at a level of detail proportionate to its significance and sufficient to understand the potential impact of the proposal.
2. Sets out the impact of the development on the heritage assets and mitigation that is proportionate to the impact and the significance of the heritage asset, including where possible positive opportunities to conserve and enjoy heritage assets.

Emerging Policy E13 from the Draft Local Plan 2036 provides similar advice to existing Policy CS11, but also adds that where harm cannot be avoided, mitigation may be proportionate to the impact

Assessment

The application is for the removal of 2 existing staircases and the erection of a new staircase along with the relocation of an existing wall at second floor level.

Of the two existing staircases from first to second floor, one has failed completely and has been removed and the other is not structurally sound. The proposal is to insert a new staircase in the same position as the more centralised (structurally unsafe) staircase, so that access can be made to the second floor bedrooms. As the new staircase will need to meet building regulations, it is proposed to relocate an existing studwall serving bedroom No. 4, further back into the room.

Overall it is considered that the proposed works will not result in harm to the historical significance of the building and will assist it being able to continue to be used as an occupied residential dwelling.

Conclusion – No objection.
