

Subject: RE: Land at Lower Road APP/19/00427 Condition 9

CAUTION: This email came from outside of the council - only open links and attachments that you're expecting.

Good Morning David,

Lower Road itself and Lodge Road are both lit using column lighting.

The lighting at the front door will provide some light for those at the front door, however, it does not provide light to provide for the safe use of the roadways nor provide a light that can provide for the identification of a person/vehicle on the roadways.

I would reiterate:

- That within the development there are shared surfaces, not all mechanical transport necessarily carries lights (pedal cycles, electric scooters, skate boards), lighting will provide for visibility after dark, improving the safety of those using the roadways.
- Street Lighting reduces crime and the fear of crime. Often people living within developments without street lighting carry a device that can provide a light when required. The fact they use the light demonstrates that they want to know what or who is within their vicinity.

Modern lighting can work in harmony with the ecology of the development.

I believe that if street lighting is not fitted the development will not comply with Havant Core Strategy, Policy CS8.

Regards,

Stuart
