

Woodland Curve

Our Woodland Curve lighting post offers a stunning addition to your park along pathways, roads and lodge and holiday home development areas.

Milled from 'green' timber, two options are available either larch or oak. A single coat of Danish oil is applied before it leaves our factory and subsequent coats can be applied on site after installation.

12V warm white LED strip located under aluminium backed profile arches over the post and connects into an IP68 connector junction box, designed to be located underground at the side of the post.

The overall height of the post is 1100mm allowing 300mm to be buried in the ground.

Features:

- 12V 28.8W
- Larch or Oak Option
- Loop in and out facility
- Connection box included
