Subject: RE: Planning Application APP/19/00007 Camp Field (land to the west of Havant Crematorium), Bartons Road, Havant

Hi David,

I have had a look at the EV information. As far as I can see they have submitted just one plan regarding EV Charging Points, with blue dots marking which properties will have them. As I read the plan, the proposal is for one per dwelling, which is fully compliant with emerging policy. In policy terms we are therefore happy.

However, I can't see any details that satisfy the part of condition 22 that reads 'The details shall include the location of the EV charging points and a full specification of the materials to be used externally on the Charging points.' Presumably that would include location on the building, details of materials and an image of what the thing actually looks like. While Policy wouldn't need/want to comment on this, presumably you would want this to be satisfied from a design / visual perspective.

Hope this helps

Jacqueline
