Comments

Notwithstanding that the applicant has not made clear how this development meets the criteria of permitted development (in particular, >4 no. antenna are proposed, and no length / volume information provided); I do not envisage any specific issues with the upgrade of telecom's equipment at this location. Whether prior approval or full application is required is a planning matter falling outside the remit of Environmental Health, and I would return a response of 'no adverse comments' whether this were a full application or whether the PN criteria have been deemed to have been met.

No objections.
