

Dear Mr Eaves,

As discussed, I have attached a revised version of the site plan to deal with your query relating to parking.

This shows an area alongside Unit 5A for up to three cars or vans, and the main area of shared parking for deliveries and visitors hatched red.

Across the centre, there is no designated parking. Zero Networks have been in unit 5a for 2 years, and the previous tenant was there for 10 years with no problems whatsoever. Zero Networks are internet trading and do not have customers visiting – only the odd delivery which has never been a problem with parking.

I trust that this is now satisfactory.
