4th September 2015

Dear Tina,

We note the previous refusal by Havant Borough Council of our plan to enlarge our kitchen with a small conservatory. Life has now moved on for us and we thought that you would like to know how our plans have evolved.

We are going to build a "Disabled Friendly" Porch with ramp access on the front of the bungalow between the 2 windows facing the road. Planning regulations allow this. As you know the front doors of these bungalows will not adapt for disabled access. The levels are wrong and the doors are too narrow.

re-applying to the planners for the porch design to be slightly enlarged, so it will be possible for a mobility scooter to be driven up into the building.

We are hoping that our new plan will be acceptable to you, but if you feel uncomfortable in any way about this project, do please discuss it with us.

The creation of this disabled access to the bungalow will make it possible for us to continue living independent lives.

Yours sincerely

Shaun & Liz McCullagh
