Dear Peter

Travel Plan Letter of Compliance

This Travel Plan Letter of Compliance (TPLC) has been produced by Paul Basham Associates to support application: APP/15/01233 for 1,920sqm of Warehouse, ancillary 890sqm of office space and 220sqm of training school facility. This TPLC has been requested by Havant Borough Council Highways department to ensure the proposed development operates in a sustainable manner, and supporting the level of car parking proposed.

Mipa Paints (the applicant) are a medium-sized company who produce varnishes and paints with a head office in Germany. Mipa currently occupy a unit to the north of the proposed site in Applied House, Fulflood Road. Due to an expansion of the warehouse needed, the operation will relocate to the south of Fulflood Road, remaining in the same industrial estate. Staff will therefore be aware of local travel options and of their surroundings.

Mipa Paints' Logistics and Warehouse Manager: Peter Keniston will act as the Staff Travel Coordinator for the site. This role includes encouraging car sharing, cycling and other modes of travel. The Staff Travel Coordinator will also be responsible for a sustainable travel display which will be visible for all staff and visitors to the site. This display board will consist of local bus and rail timetables, local walking and cycling routes and taxi firm numbers. The display should also encourage car sharing, promoting hants.liftshare.com and an internal car sharing scheme if applicable.

There are two existing bus stops on Dunsbury Way, within 150m of the site. Both bus stops benefit from shelters, seating and travel information. Stagecoach runs frequent services to these bus stops, with the 23 running every 10 minutes to Southsea. Other destinations include Portsmouth at a 15 minute and 30 minute frequency and Emsworth at an hourly frequency. The development is within close proximity of National Cycle Route 22, which connects the site with Petersfield in the north and Portsmouth to the south. The site will be equipped with 20 lockable sheltered cycle spaces available for staff use along with showering facilities along with 4 visitor cycle spaces.

This document has been signed by the designated Staff Travel Coordinator who has agreed to the above and will adhere to the role and responsibilities. Should the Staff Travel Coordinator require additional support Hampshire's: My Journey offer 'My Journey to Work' conferences which could be of assistance.

Peter Keniston

Logistics and Warehouse Manager and Staff Travel Coordinator at Mipa Paints

Yours sincerely

Mark Smith
