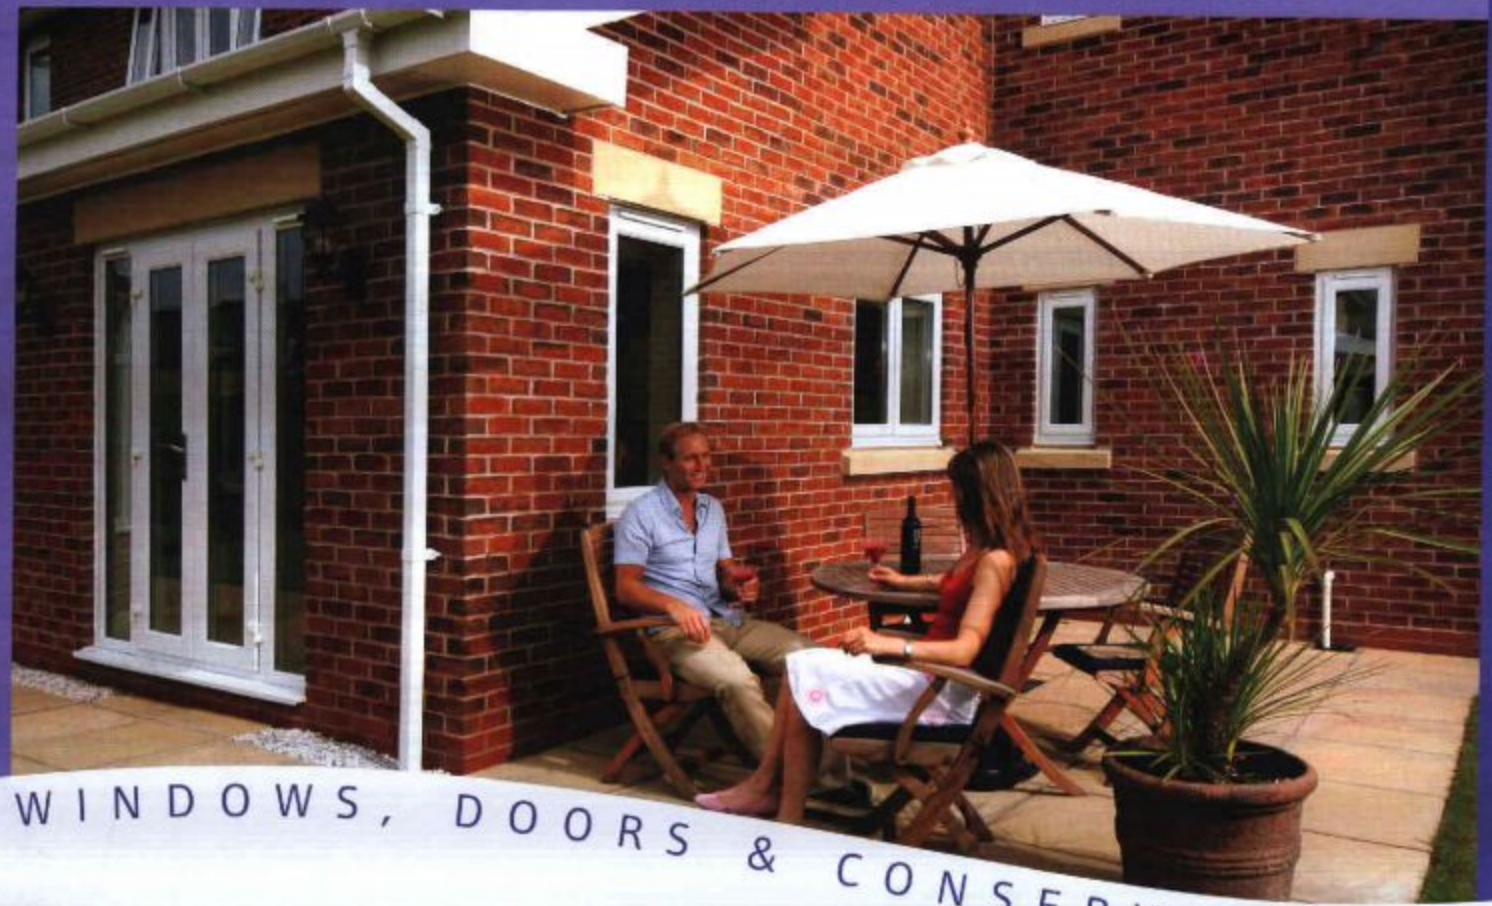
HOME CREATIONS



WINDOWS, DOORS & CONSERVATORIES

APP/10/0070

If you are looking for an attractive, maintenance free alternative to timber you need look no further than our range of high quality PVCu window, door and conservatory products. The versatility and elegant good looks of our comprehensive range of products are designed to suit any style of architecture. We can offer you a design tailor made to meet your individual needs.

More people are beginning to realize the value of PCVu for the replacement of timber in the home. Tough, durable and virtually maintenance free, it is hardly surprising that PVCu is today the most popular choice for replacement windows, doors and conservatories.

QUALITY

Only the best materials are used to manufacture our comprehensive range of products. For example, the PVCu profile supplied by Duraflex meets the highest standard for quality. Products are manufactured using calcium organic material produced under the latest British standards. PVCu has now achieved a Green Guide A rating which firmly establishes products as sustainable.

SERVICE

Our commitment to quality extends from manufacture to customer service and support. Every customer is guaranteed a personal and professional service. Expert advice is offered on the design of applications which best suit your home and your pocket, and you can be sure of a trouble free installation with the very best in after sales support.

PERFORMANCE

Enjoy the benefits of improved heat and sound insulation. Our well insulated frames, quality double glazing, weather tight seals and multi chambered profiles ensure that heat loss is kept to a minimum. Where noise is an issue, the thermal insulation properties of PVCu and our unique Q-Lon gasket will help to reduce noise from the outside world.
Energy rated products are also available to ensure the best thermal efficient products not only complement

your home, but benefit the environment and reduce energy bills.

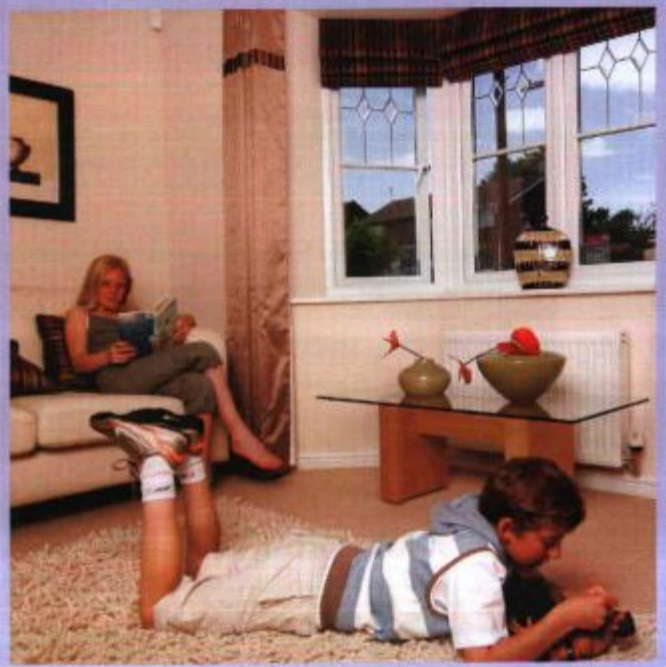
The tough exterior of our doors, windows and conservatories are designed to withstand the extremities of weather. The maintenance free finish retains their good looks with just a wipe over with a damp cloth.On the other hand, our tilt and turn window provides dual opening. By simply twisting the handle, you can engage the side hinges and swing the window right open for full ventilation or tilt the window inwards in a fixed position for gentle ventilation.

Home Improvement

Windows

The PVCu window has come a long over the past two decades. Gone are the days of bulky and obtrusive frames which spoil the appearance of a home. Today, PVCu windows are not only designed to look good, but also to meet the highest standards of quality and performance.

No matter what style of property, we can offer you a design of window which complements the architecture. From the simplest casement window to the grandest Victorian bay, we can create both traditional and individual looks for your home.



Once you have decided on the most appropriate style of window to suit your home, you are in a position to look at the many different ways available to enhance their appearance.

For those customers looking for a totally different style from that of their neighbour, the solution may be to opt for a different glazing technique or opening position. Our comprehensive range of window styles will accommodate your individual needs. When it comes to security, we will not let you down – all our windows are produced with the latest locking systems which offers superb security and weather protection, so you'll feel safe and secure in every way.

Windows

The casement window is the most popular style of window, lending itself to virtually any application. The versatility of the system means that you can choose the positioning of the opening sashes to best suit your needs.

On the other hand, our tilt and turn window provides dual opening. By simply twisting the handle, you can engage the side hinges and swing the window right open for full ventilation or tilt the window inwards in a fixed position for gentle ventilation.

Combine the traditional and the modern with vertical slider windows

The vertical sliding sash window range combines the elegance of traditional sash windows with the benefits of modern materials. Manufactured from PVCu they are strong, will not rot, warp or require repainting; ensuring that they retain their colour and shape throughout the years with the minimum of maintenance. Suitable for both replacing existing timber sliders in period buildings and adding character to any development, vertical sliders retain all the traditional features of their familiar counterpart but with the enhanced benefits that modern PVCu systems provide.

Make a focal point of your room by choosing one of our high quality doors, which are available in two, three or four pane styles. Our range of products are available in a number of styles and finishes to suit your needs.

To maximize the opening and bring the outside in, a bi-fold door may be your choice to fully utilize your room and lifestyle. A wide range of opening styles are available to suit your application.

Alternatively, our elegantly styled French doors may best suit the style of your home and with the addition of glazed and solid panels, you can create a design to suit your lifestyle.

As always, safety and security have been given top priority, all our products are available with high security locks and toughened or laminated glass is fitted as standard.

Conservatories

Extend your home with one of our PVCu conservatories and you will discover a whole new outlook on life, because a conservatory is more than just another room, it's a room with a view.

Conservatory extensions are installed for so many different reasons – a playroom, an office, dining room or study to name a few.

Our conservatories can be tailored to suit your every need. We have a range of traditional lean-to, Victorian, Edwardian and combination conservatories to choose from, with fully glazed, dwarf all or insulated feature panel design options.

Another important consideration in the design of your conservatory is the style of the windows and doors. Once more, the choice is yours – simply select the style that best suits your needs from our comprehensive range of designs.

Conservatories

The design of your conservatory is simply down to personal preference. We have a wide range of designs that will harmonise with the surroundings of your home and garden – all you need to do is decide on the style and size of the conservatory that best suits your needs and budget. It's as simple as that!

To further improve the environment of your conservatory, a choice of glass roofs are available to improve thermal performance.

Conservatories

With so many options to consider when choosing your new conservatory, we appreciate the difficulty of finding your perfect solution. To help you decide what is best for you and your family, one of our experienced sales staff will be delighted to discuss the various options available to you.

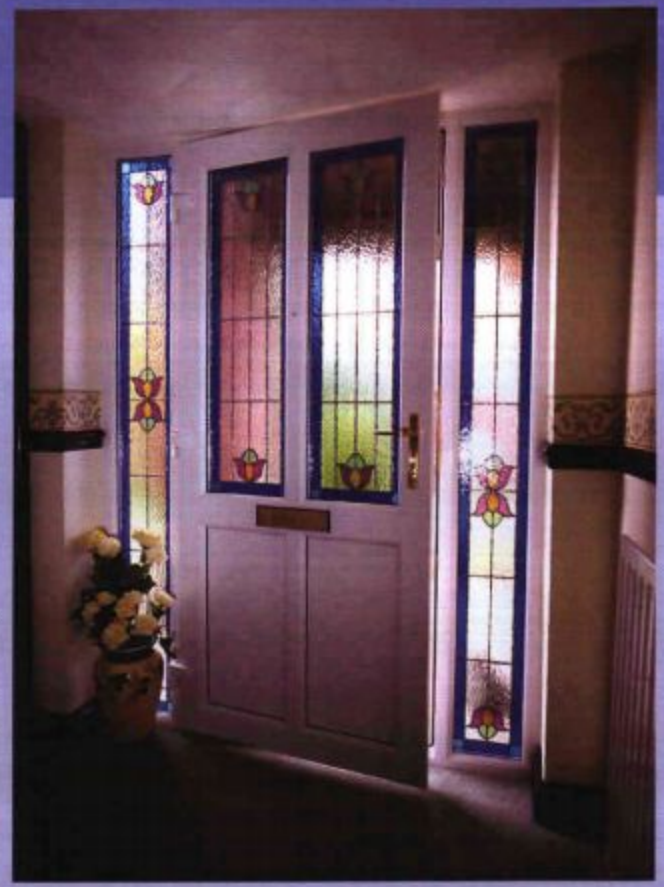
Residential Doors

When people visit your home, first impressions are often based on the appearance of your property and the focus of attention is usually on the door which welcomes them. Choose one of our PVCu or composite doors to create a warm welcome for all of your visitors.



Apart from looking good, you obviously want the guarantee that your door will withstand the knocks of family life, year in and year out, without ever looking worse for wear. Our range of PVCu residential doors not only look good, they are built to keep some people out. Attention to security has been given top priority and all our doors are fitted with the best security features including multi-point locking mechanisms.

Composite doors are an alternative to PVCu doors, offering all the benefits of low maintenance and security but with the traditional look of a timber door.

Residential Doors

WHICH EVER STYLE OF DOOR YOU CHOOSE,
WE CAN OFFER A WIDE RANGE OF GLAZED AND SOLID OPTIONS

Choosing the door which best suits your lifestyle and the character of your home will not be a problem. For example, if you want light to flood in and brighten the hallway we can offer you a range of glazed options, or if you want privacy from the outside world, choose from a range of solid options. Whichever options you choose for your home, we can offer you an extensive range of insulated feature and side panels with glazed options designed to accommodate every type of installation.

Residential Doors

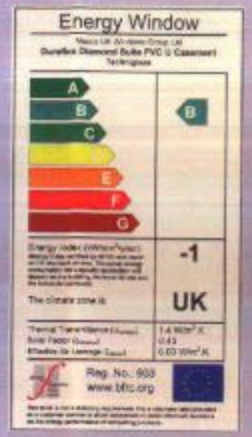
Our comprehensive range of woodgrain products are available in a range of finishes – brilliant white, mahogany, rosewood and golden oak. Woodgrain on white provides the solution of achieving the look of traditional hardwood frames on the outside and brilliant white frames on the inside.

A wide range of window and door furniture is available and our sales representatives will be pleased to present samples which best meet your individual needs.

The Finishing Touch

Energy Rated Windows

Selecting double glazing for your home is a major decision, it is an important and lasting investment in your property so understandably you'll want to get it right. With rising fuel costs, you'll be looking to create a comfortable home environment that remains affordable to heat.



If the windows in your home consist of single or older double glazed units, replacing them with energy efficient windows will save you money, in fact it can reduce the energy you need to heat a home by upto 20%.

With visible benefits for both the environment and your home, it's clear to see why energy efficient windows are important; so how do you choose the best ones for you?

The Government has set itself a specific target of ensuring all new homes built after 2016 are zero carbon. This is in addition to the general requirement of an overall carbon emission reduction as set out by the Kyoto agreement.

To highlight this topic and enable a system which is both an independent source of information and also easy to understand, the BFRC (British Fenestration Rating Council) working in conjunction with the Energy Efficiency Council, have created a performance label clearly defining the energy efficiency of windows from any manufacturer.

The Window Energy Rating label is similar to that used on many white goods in our homes, such as fridges and washing machines. Windows are scored on a scale of A – G, with an A rated window being more energy efficient than a G rated window.

By thinking and acting greener, you can reduce both your impact on the environment and your heating bills. This is why energy efficient windows are the clear choice.
