Subject: RE: Planning application APP.20.00840 (11 Clinton Road, Waterloooville)

Good day jane

I agree with Jonathans comments below. Following on from those, I would add that any noise related complaints impacting on amenity, that might potentially be received in the future would likely be investigated in terms of legislation available to us.

Having read the Planning statement and looking at the plans, there is no indication that any air moving equipment e.g. air conditioners have been provided or are intended to be provided, which could potentially be a mechanical noise source, which could require mitigation. I would assume that if this application were to be approved, that any such equipment that the applicant may want to install in future for the business, would require a further application, which we would likely comment on at that time.

If you should have any queries related to any particular noise issues, please give me a call.

Kind regards

Mark Moss
