Erica grouped at 6 plants per sq. m, all other planting at 4 plants per sq. m. Spectos to be randomly mixed in plants of one species of varying sizes. Avoid straight lines, staggered.

Two varieties of 12-15 cm x 15 cm deep pot, backfilled with 80% clean topsoil well mixed with 20% PM and 20% grass granular fertiliser.

All plants 25-35cm height/spread, 5L pot grown.

| Mix L - Native tree and shrub mix edge planting     |          | Total area = 100 sq. m       |
|-----------------------------------------------------|----------|------------------------------|
| species [all 1-3 m, 5 breaks]                       | grouping | % of mix      quantity (no.) |
| Hedera helix 'Hibernica' (around front edge of bed) | 7-11     | 20                      80   |
| Loniceria periclymenum (around front edge of bed)   | 7-11     | 30                      120  |
| Symphoricarpos chenaultii 'Hancock'                 | 9-15     | 50                      200  |

All planting of all plants per sq. m. Species to be randomly mixed in groups of one species of varying sizes.

All plants listed, staggered.

Plants planted in 0.3 x 0.3 x 0.3 m deep pit, backfilled with 80% clean topsoil well mixed with 20% TPMC, and 20 grams granular fertiliser.

All species 25-35cm height/spread, 5L pot grown.

NOTE:  
Correct species to be provided and no substitutions to be made without prior agreement  
of the Landscape Architect
